

PRESS RELEASE - Subject: 454 WORKING GROUP

The EIA G-32 General Requirements Committee formerly associated with the Electronics Industries Alliance (EIA) is now associated with Parts Standardization & Management Committee (PSMC). As of April 16, 1998, based on unanimous consent, it was agreed to disassociate the 454 Working Group (MIL-HDBK-454, General Guidelines for Electronic Equipment) from EIA and become part of PSMC. As previously discussed and agreed to at their April 21, 1998 meeting in Palm Beach Shores, FL, PSMC has made preliminary plans to incorporate a new subcommittee within the PSMC structure to address current and future MIL-HDBK-454 Guidelines coverage.
