

Description:

Defense Supply Center Columbus is considering a solicitation/award that would incorporate the general rules/guidelines of the current Fleet Automotive Support Initiative (FASI) SP0750-00-D-9714; SP0750-00-D-9715 and SP0750-00-D-9716. The primary goal in this endeavor is to improve customer support at the user level, ensuring World Wide Military readiness in the process. The primary customers are the Army and Marine Corps, including the Reserves and National Guard. However, any DoD activity with land-based vehicles is included in the scope of the program. The vendor will be required to support the identified vehicles at military installations within the region by providing Class IZ items/ spare parts to the wholesale or retail inventory level, or direct to a user at any specified location. DSCC will partner with the customer to identify specific vehicles or items for which a FASI prime vendor can provide parts support, technical support, fleet requirements forecasting, inventory management, or other enhanced services as required by the customer. FASI will improve DLA logistics response time and increase mission readiness at a cost comparable to traditional methods of support. The Prime Vendor must be capable of receiving and transmitting by Electronic Data Interchange (EDI). The Government will transmit orders by EDI using the conventions and formats prescribed by the American National Standards Institute (ANSI) X12 and the Department of Defense (DoD) Implementation Guidelines for the transfer of acquisition data and invoicing. The term of the contract will consist of a Base Period of two years with three (1-year) option Periods for a total of 5 years.

Under the terms of the contract, the VPV will be responsible for:

- 1. Supply chain and Inventory management**
- 2. Parts acquisition**
- 3. Distribution**
- 4. Material forecasting**
- 5. Obsolescence management**
- 6. Provide dedicated program customer service representatives-customer or area specific.**

In order to determine whether this initiative would be in the best interest of the Government, we are seeking sources interested in participating. The potential population of items for this initiative is 1980. DSCC is requesting responses from interested parties.

Historically, DLA items are purchased through individual negotiated procurements resulting with DLA managing a supply chain integrator. FASI-Global will establish the basic contractual framework for our customer to interface directly with the VPV to obtain tailored logistics support.
