

5011 Compliant Materials

1. The information listed below is not intended to and does not connote endorsement of the manufacturer/supplier or their product and/or services by the U. S. Government.
2. As a result of the Commercial Laboratory Suitability program administered by DSCC-VQ the following information has been provided by the following suppliers.
3. The suppliers listed below have stated that the epoxy materials listed under their company's name have meet the suppliers testing requirements of MIL-STD-883, TM 5011.
4. MIL-STD-883, TM5011 requires the user to perform certification and acceptance testing on each epoxy material.
5. The user must carefully research the epoxy to determine if the epoxy will work in your application (process and materials).
